

Features

Our digital FieldChecklist® solution for EHSQ (Environmental, Health, Safety & Quality) field inspections enables you to collect, inspect, analyze and report field inspection data faster and more seamlessly, reduce inspection time, and identify and remedy safety and compliance issues quickly.

FieldChecklist® features include:

CHECKLIST DESIGN WIZARD

Build & share checklists online in minutes with our easy to use design wizard with embedded data, branching, skip logic, piping, action alerts, randomization, etc.

DATE, TIME & LOCATION STAMPING

Leverage time, date, and location stamp data to verify when a field inspector conducts an inspection at each location for better auditability and compliance.

ATTACH PHOTOS, VIDEO, AUDIO & DOCUMENT FILES

Your workers truly can be your eyes and ears in the field by capturing photos, video, and audio to show the whole story of what's happening on-site.

OFFLINE MODE

No internet connection is required to collect inspection data! Our system will automatically go to "online mode" once an internet connection is available.

DIGITAL SIGNATURE

Digitally sign and submit your inspection reports in real time.

TEMPLATE LIBRARY

Create checklists faster and easier by choosing from an existing library of checklist templates.

EVENT-BASED ALERTS

Event-based alerts empower you to respond to problems in the field in real-time instead of in hours or days. Send notifications by SMS, text or email.

CUSTOMIZABLE DASHBOARDS

Choose from a variety of dashboards and reporting tools to tailor to your unique reporting needs. Data views include spider charts, scatter graphs, histograms, etc.

ANY DEVICE OR OPERATING SYSTEM

Conduct field inspections using any mobile device with iOS, Android or Windows Operating Systems.
